Tempo, Cadence & Rhythm Kitchen Pendants 18740, 18742 & 18744

Page 1 of 3

CAUTION: FAILURE TO INSTALL THIS FIXTURE PROPERLY MAY RESULT IN SERIOUS PERSONAL INJURY OR DEATH AND PROPERTY DAMAGE. We recommend installation by a licensed electrician.

This product must be installed in accordance with applicable installation code(s), by a person familiar with the construction and operation of the product and the hazards involved.*

Caution: Do not exceed maximum wattage noted on fixture. Use only recommended bulbs with fixture.

These instructions will be used for the following Fixtures:

18740

18742

18744 (shown)

Stem Assembly (Figure 1)

Component Parts

- A Fixture Pipe
- B Fixture Coupling

1. Carefully unpack the fixture from the carton.
2. Carefully slip fixture pipe (A), threaded end first, over fixture wires.
3. Apply a drop of the supplied thread locking compound to the threads of fixture pipe (A) and screw pipe into fixture coupling (B), being careful not to twist or pinch the wires.

Note: Application of the thread locking compound is necessary to prevent the stem from loosening during regular maintenance and cleaning of the fixture. Be certain to apply the compound.

Page 2 of 3

Prepare the Canopy (Figure 2)

Component Parts

- C Crossbar
- D Jam Nut
- E Threaded Nipple
- F Canopy
- G Canopy Ring

Caution: Be sure power is off at the main breaker box prior to installation.

1. Thread the jam nut (D) and crossbar (C) onto threaded nipple (E); leave both parts loose.
2. Using two machine screws (not provided), temporarily fasten the crossbar (C) to the electric box. **Note:** A new electric box comes with screws. When replacing a fixture, retain the existing screws for use with the new fixture.
3. Adjust the length of threaded nipple (E) in crossbar (C) so that canopy ring (G) will hold canopy (F) against the ceiling with no threads showing for best appearance. When the correct adjustment is established, tighten jam nut (D) against crossbar (C) to hold the adjustment.
4. Remove the crossbar (C) with stem from the electrical box and proceed with the assembly instructions on following page.

(Figure 2)

Install Glass (Figure 3)

Component Parts

- L Socket
- M Washer (not needed on 18740)
- N Spacer Ring
- O Retaining Ring with Cover
- P Glass

1. Remove retaining ring with cover (O), spacer ring (N) & washer (M) from socket (L). Retain for later use. *Parts ship installed.*
2. Slide glass (P) over socket (L) followed by washer (M) and spacer ring (N).
Note: Washer (M) not needed on 18740 Fixture.
3. Thread retaining ring with cover onto socket to secure glass (P). *Do not over tighten ring (O).*
4. Install bulb into socket (L).
5. Restore electricity at main breaker.

Install Fixture (Figure 3 & 4)

Component Parts

A	H Canopy Pipe
B Fixture Pipe	I Ground Screw
C Crossbar	J Clutch
F Canopy	K Set Screw
G Canopy Ring	

Caution: Be sure power is off at the main breaker box prior to installation.

1. Carefully slide canopy ring (G) and canopy (F) down over fixture pipe (A) until they rest on the fixture. Make sure smaller diameter side of canopy ring (G) is oriented up toward the canopy (Figure 3).
2. Slip wires from the fixture pipe (A) through the canopy pipe (H).
3. Unscrew the clutch (J) from the canopy pipe (H); slide it across the wires and onto the fixture pipe (A). Follow this with the plastic sleeve, oriented so the tapered end nests in the clutch (J) (Figure 4)

4. Slide the canopy pipe (H) on to fixture pipe (A) as far as necessary to give you the total length of the fixture, which you desire. Be careful not to scratch the pipe surfaces and to pull excess wire up through the canopy pipe (H). There must be a minimum 1-1/2" of inner pipe inside the outer pipe. Hand-tighten the clutch to temporarily hold this adjustment. The clutch is not securely fastened at this point; do not depend on it to hold the fixture.

Important: To ensure full connection strength, be sure the tapered end of the plastic clutch sleeve is oriented toward the clutch when assembled and securely tighten set screw (Figure 4).

5. Using two machine screws (not provided), fasten the crossbar (C) to the electric box.

Note: A new electric box comes with screws. When replacing a fixture, retain the existing screws for use with the new fixture.

6. Using suitable wire connectors (not provided), connect fixture wires to supply wires (white to white supply, black to black supply). Run a pigtail lead from crossbar ground screw (I) to the junction box and connect all ground wires (bare copper or green to bare copper or green). Push wires back into outlet box. **Caution: Make sure wire connectors are twisted on securely, and no bare wire is exposed.**

7. Slide canopy (F) against ceiling, and secure with canopy ring (G).
8. Once the fixture is fastened to the ceiling, tighten the set screw (K) firmly with hex wrench provided.
9. Restore electricity at main breaker.
