## Component Parts

- A Fixture**
- B Crossbar**
- C Ground Screw**
- D Jam Nut**
- E Canopy**
- F Canopy Ring**
- G Canopy Pipe Assembly**
- I Nipple**
- J Fixture Pipe**
- K Clutch**
- L Set Screw**
- M Plastic Sleeve**
- N Tri-washer**
- O Cable (3)**
- P Nylon tipped thumb screw (3)**
- Q Glass**
- R Clamp (3)**
- S Bulb (not included)**

# ASSEMBLY & INSTALLATION INSTRUCTIONS

A506

Lens Pendant 187510

**CAUTION: FAILURE TO INSTALL THIS FIXTURE PROPERLY MAY RESULT IN SERIOUS PERSONAL INJURY OR DEATH AND PROPERTY DAMAGE.** We recommend installation by a licensed electrician. This product must be installed in accordance with applicable installation code(s), by a person familiar with the construction and operation of the product and the hazards involved.\*

Caution: Do not exceed maximum wattage noted on fixture. Use only recommended bulbs with fixture.

Please Note: After installation extra hardware and accessories are possible due to our kits are used on multiple products and options.

## To Install Fixed Height Fixture (Figure 1)

**CAUTION: BE SURE POWER IS OFF AT THE MAIN BREAKER BOX PRIOR TO INSTALLATION.**

1. Carefully unpack fixture from the carton.
2. Carefully slide canopy ring (F) and canopy (E) over fixture wires so that they rest on the fixture. Make sure the smaller diameter side of canopy ring (F) is oriented up.
3. Thread the jam nut (D) and crossbar (B) onto threaded nipple (I). Leave parts loose.
4. Using two machine screws (not provided), fasten the cross bar (B) to the electric box.

**Note:** A new electric box comes with screws. When replacing a fixture, retain the existing screws for use with the new fixture.

5. Adjust the length of the threaded nipple (I) in crossbar (B) so that the canopy ring (F) will hold canopy (E) against the ceiling with no threads showing for best appearance. When the correct adjustment is established, tighten jam nut (D) against the cross bar (B) to hold adjustment.
6. Using suitable wire connectors (not provided) connect fixture wires to supply (white to white and black to black). Attach a pigtail lead to the crossbar ground screw (C). Connect all ground wires (bare copper or green to bare copper or green). Push wires back into electrical box.

**CAUTION: MAKE SURE WIRE CONNECTORS ARE TWISTED ON SECURELY, AND NO BARE WIRE IS EXPOSED.**

7. Slide canopy (E) against ceiling and secure with canopy ring (F).
8. See 'To Install Glass' to complete installation.

## To Install Adjustable Height Fixture (Figures 2 & 3)

1. Carefully unpack fixture from the carton.
2. Thread the jam nut (D) and crossbar (B) onto threaded nipple (I). Leave parts loose.
3. Using two machine screws (not provided), temporarily fasten the cross bar (B) to the electric box.

**Note:** A new electric box comes with screws. When replacing a fixture, retain the existing screws for use with the new fixture.

4. Adjust the length of the threaded nipple (I) in crossbar (B) so that the canopy ring (F) will hold canopy (E) against the ceiling with no threads showing for best appearance. When the correct adjustment is established, tighten jam nut (D) against the cross bar (B) to hold adjustment.
5. Remove the crossbar (B) from the electrical box and proceed with assembly instructions.
6. Carefully slide canopy ring (F) and canopy (E) over fixture pipe (J) until it rests on the fixture (A). Make sure the smaller diameter side of canopy ring (F) is oriented up.
7. Slide the wires from the fixture pipe (J) through the canopy pipe assembly (G).
8. Unscrew the clutch (K) from the canopy pipe assembly (G); slide it across the wires and onto the fixture pipe (J). Follow this with the plastic sleeve (M), oriented so the tapered end nests in the clutch (K). (Figure 3)
9. Slide the canopy pipe assembly (G) over the fixture pipe (J) as far as necessary to give you the total length of the fixture which you desire. It may be necessary to loosen the set screw (L) in the clutch (K). Be careful not to scratch the pipe surface and to pull excess wire up through the canopy pipe assembly (G). There must be a minimum 1-1/2" of inner pipe inside the outer pipe.
10. Tighten the set screw (L) in clutch (K) firmly with hex wrench provided.
11. Using two machine screws (not provided), fasten the cross bar (B) to the electric box.
12. Using suitable wire connectors (not provided) connect fixture wires to supply (white to white and black to black). Attach a pigtail lead to the crossbar ground screw (C). Connect all ground wires (bare copper or green to bare copper or green). Push wires back into electrical box.
13. Slide canopy (E) against ceiling and secure with canopy ring(F).
14. See 'To Install Glass' to complete installation.

**CAUTION:** MAKE SURE WIRE CONNECTORS ARE TWISTED ON SECURELY, AND NO BARE WIRE IS EXPOSED.

## To Install Glass (Figure 4)

1. Locate ball end of the cable (O) that is attached to the clamp (R).
2. Place ball end of cable (O) into tri-washer (N). Repeat for remaining cables (O) and clamps (R).
3. Loosen thumb screws (P) in each of the clamps (R).
4. Place glass (Q) in opening of clamps (R), spacing them equally around the glass.
5. Tighten down thumb screws (P) until glass is held firmly. Do not over tighten.
6. Install bulb (S).
7. Restore electricity at main breaker.

**Note:** Hand blown glass varies in thickness. It may be necessary to spin the glass in order for the thumb screws to make contact and hold the glass securely.

If you need further assistance, or find that you are missing any parts, please contact the dealer from which you purchased this product. We hope you enjoy your fixture!

\*Hubbardton Forge will not be liable for injury or damage caused by improper installation, lamping or use of this fixture.
